DETAILED ACTION

Response to Arguments

Applicant's arguments filed on January 4th, 2005 have been fully considered but they are not persuasive. The applicant argues that Menin appears to be silent as to any discussion or suggestion with regards to the actuator being a pneumatic or magnetic actuator. The examiner disagrees. In the original claim 6, the applicant clearly stated that the actuator is selected from a group consisting of a pneumatic, electrical, mechanical or a magnetic actuator making the original claim 6 a Markush -type claim meaning that the type of actuator mentioned in original claim 6 are equivalent and any one of those could be used to perform the task at hand. Therefore the electrical/mechanical actuator can be used to substitute the pneumatic/magnetic actuator as claimed in the amended claim 6.

Therefore the currently amended claim 1, original claims 2, 3 and 4 are still rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Application Publication Number 2001/0047834 to Menin et al. as stated in the previous office action dating back to August 23rd, 2004.

Claims 7 through 33 are still allowed as stated in the previous office action dating back to August 23rd, 2004.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3743

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
